SUMMARY

Product-minded full-stack engineer with 3+ years of experience building web and mobile products with React, Next.js, TypeScript, and React Native. Ships production applications across financial services, healthcare, eCommerce, and AI-powered consumer products, from component architecture and CMS modeling through serverless APIs and deployment. Partners closely with designers, stakeholders, and content teams to turn complex requirements into flexible, maintainable experiences.

EXPERIENCE

 **AccuSpeech** (warehouse automation startup) 05/2026 – Present
Part-Time Contract Developer

- Develop JavaScript voice-automation workflows for web-based warehouse management systems by targeting DOM elements and mapping screen and field metadata in XML configurations
- Build XML-to-proprietary-grammar workflows for voice dictation and implement features in a VS Code extension for generating and editing XML screen definitions

 **Alice** (digital design studio) 08/2025 – 05/2026
Contract Developer · Los Angeles, CA

- Built a WCAG-compliant Shopify storefront for EyePromise, taking it from Figma to launch in four months with a reusable Liquid component and merchandising system
- Delivered CareDx.com on a 2-engineer team, partnering with designers and client stakeholders to launch a 32-page Next.js App Router marketing platform
- Built a composition system mapping 30+ Contentful content types to approximately 30 reusable React Server Components, increasing authoring flexibility while simplifying CMS architecture
- Integrated Contentful live preview, Hightouch data activation, Wistia lead-gating, and geo-aware content by extending CMS models with authorable IDs consumed by frontend components and backend services
- Built TypeScript-first GraphQL data layers with code generation for Next.js projects using Contentful and DatoCMS, preserving type safety between CMS content and frontend components

 **Edenspiekermann** (global design & technology studio) 12/2023 – 05/2025
Developer · Los Angeles, CA

- Served as the sole engineer on an AI-powered React Native client application, learning mobile development, OpenAI integrations, Cloudflare Workers, and App Store deployment to launch on iOS within a ~4-month timeline
- Designed and implemented the serverless Cloudflare Workers backend, including APIs, caching, and GPS-driven AI story generation; supported hundreds of API requests during testing and launch
- Shipped 5 client React and Next.js applications from Figma to production, selecting rendering strategies and architecture patterns for each product's requirements
- Developed 50+ React components and modeled content structures in Adobe Experience Manager (AEM) for Northern Trust Wealth Management's marketing website as part of a 6-engineer team
- Built AEM models, Sling Models, Content Fragments, and reusable theming that enabled 10+ content authors to customize and publish page experiences without development support
- Mentored a junior developer through code reviews and technical guidance for approximately 8 months while collaborating with designers, stakeholders, and CMS authors

 **Edenspiekermann** 10/2022 – 12/2023
Jr. Developer · Los Angeles, CA · promoted to Developer after 14 months

 **MIG Real Estate** 01/2018 – 08/2021
Asset Management Analyst · Newport Beach, CA

- Managed a 3M+ sq. ft. office, retail, and industrial portfolio, overseeing leases, capital projects, budgeting, and coordination with property managers

TECHNICAL SKILLS

Languages & Frameworks:

JavaScript, TypeScript, React, Next.js, React Native, Node.js, GraphQL, Shopify Liquid

Styling & Design Systems: CSS3, Sass, Tailwind

Backend & Infrastructure: REST APIs, Express, Cloudflare Workers, SQL, MySQL, MongoDB, Vercel

CMS:

Contentful, DatoCMS, Adobe Experience Manager

AI-Assisted Development:

Claude Code, Cursor

Tooling & Practices:

CI/CD, GitHub Actions, Storybook, Vitest, Figma, Agile

EDUCATION

University of Southern California – BA Economics, 2017
